# Course structure

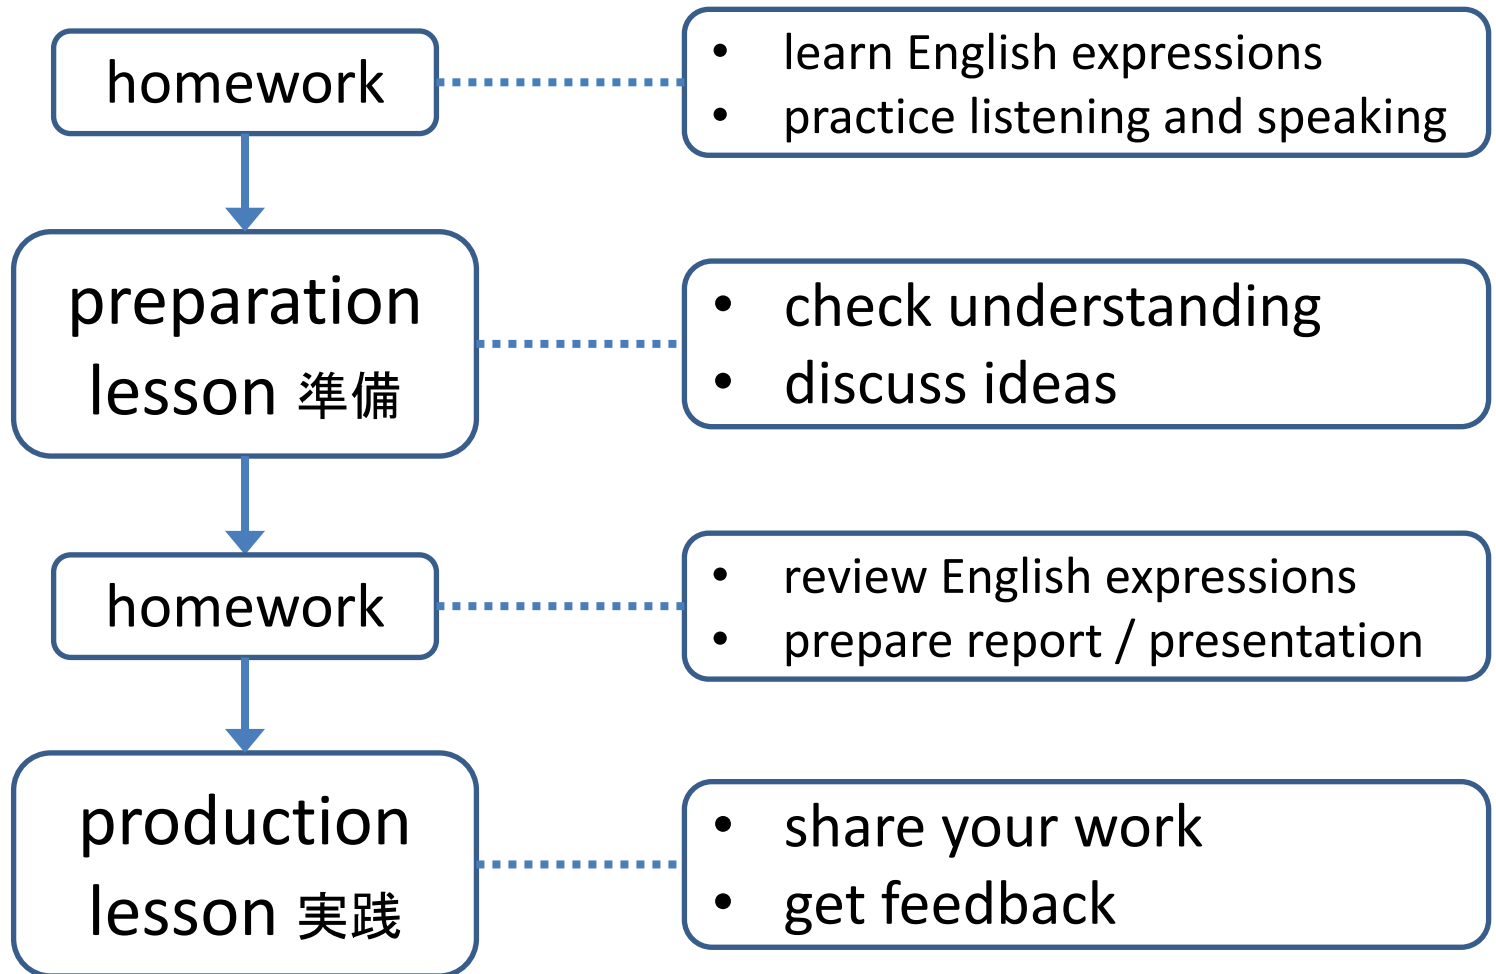

# Course structure

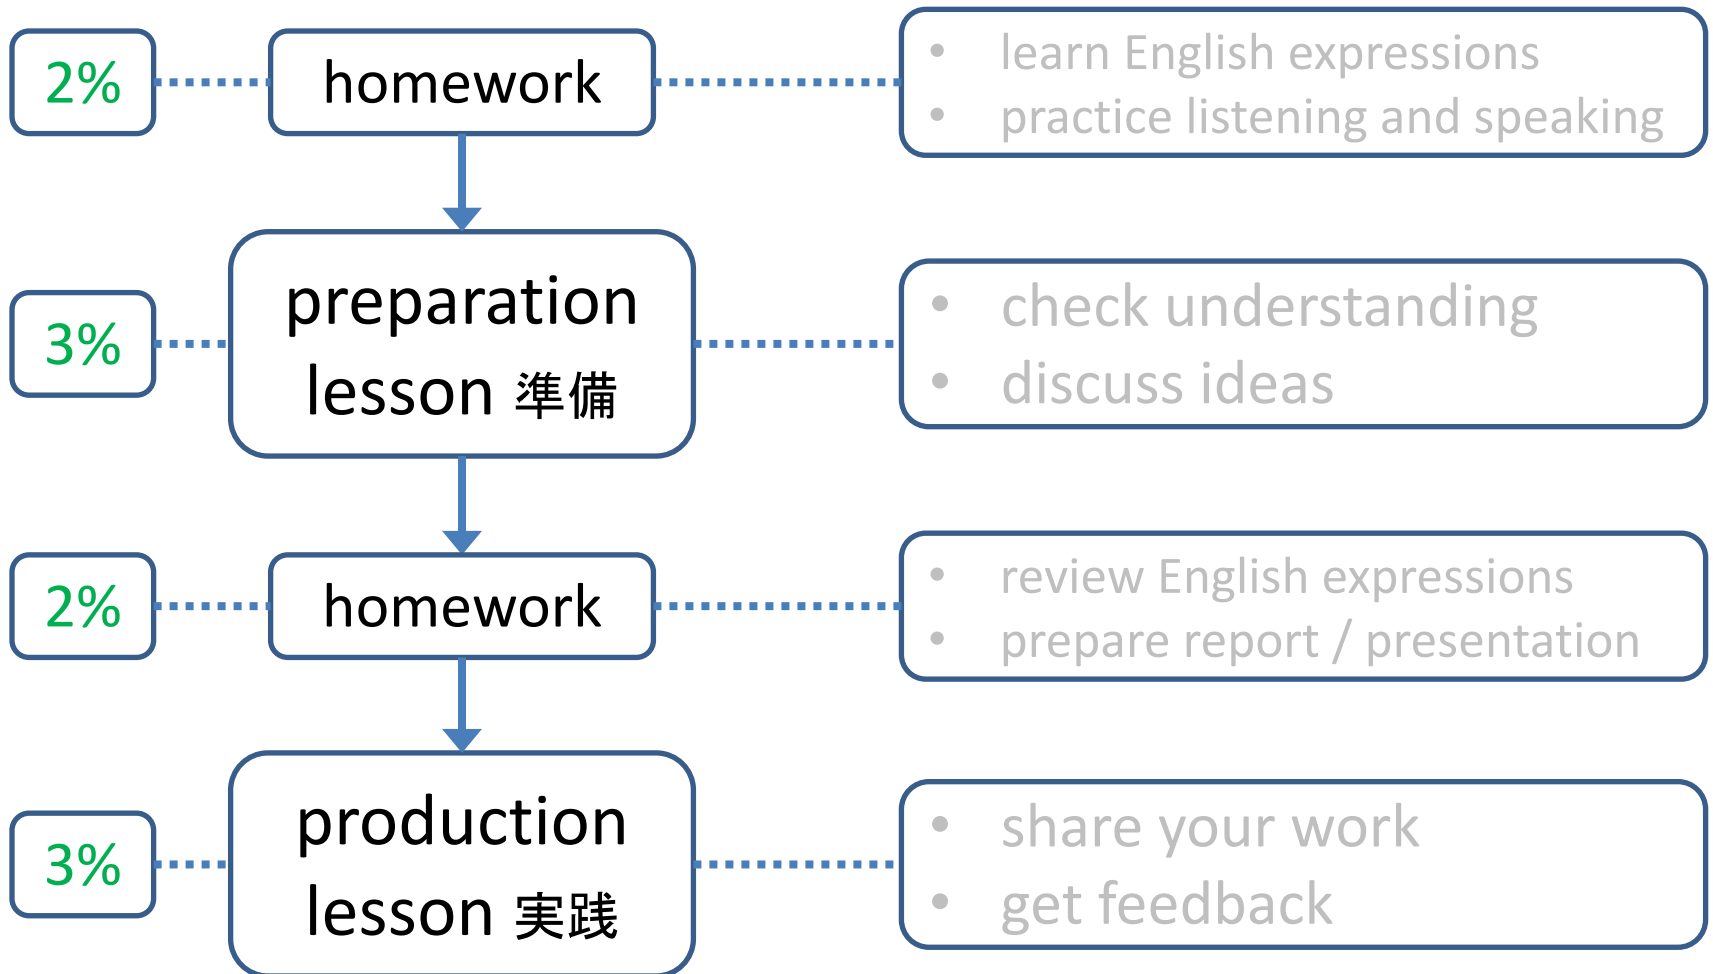

During this course, students study 7 discourse styles that are useful for presenting ideas in English. Two lessons are spent on each style - one preparation lesson and one production lesson. For homework, students study useful vocabulary, phrases and grammar, and prepare for the following lesson. At the end of the course, there is a final test.

この授業では、英語でアイディアを発表するのに役立つ7つの談話スタイルを学習します。各スタイルに2つのレッスンが費やされます:「準備レッスン」と「実践レッスン」。宿題として、学生は注目テーマと関係ある語彙、語句、文法構成を勉強して次のレッスンのための予習します。最後の方に小テストが行われます。

OK, let's begin ...

# Information Maps

**Definition:** An information map is a picture that shows connections between ideas.

**Rationale:** An information map is a useful tool to analyze text and to explain ideas.

**Symbols:** The following symbols are used in the information maps in this course:

# Symbols on information maps

|   |                       |  |           |
|---|-----------------------|--|-----------|
|    | a concept box         | represents a single concept, idea or event                               | Unit<br>1 |
|    | an attribute line     | shows extra information about an idea                                    | Unit<br>1 |
|    | a sequence arrow      | shows that one event occurs after another idea                           | Unit<br>2 |
|    | a choice diamond      | shows a branch in a sequence of events                                   | Unit<br>2 |
|    | a cause-effect arrow  | shows that one event is caused by another event                          | Unit<br>3 |
|    | a category line       | connects a parent category (e.g. fruit) to a child category (e.g. apple) | Unit<br>5 |
|   | a less-than symbol    | one value is less than another value                                     | Unit<br>5 |
|  | a greater-than symbol | one value is greater than another value                                  | Unit<br>5 |
|  | a not-equal-to symbol | one value is not equal to another value                                  | Unit<br>5 |
|  | an equal-to symbol    | two values are equal   | Unit<br>5 |

# Unit 1: Description

In Unit 1 of this course, we will practice describing things, people and ideas.

We will create information maps using the following symbols:

|   |                   |  |           |
|---|-------------------|--|-----------|
|    | a concept box     | represents a single concept, idea or event | Unit<br>1 |
|  | an attribute line | shows extra information about an idea      | Unit<br>1 |

Also, we will practice using English to explain information maps.

# Attributes

An attribute is “a quality or feature that someone or something has”

- Cambridge Dictionary  
<https://dictionary.cambridge.org/dictionary/learner-english/attribute>

〔もともと備わっている〕 特質、特性、性格

- 英辞郎 on the Web:  
<https://eow.alc.co.jp/search?q=attribute>

# Attributes in information maps

In information maps, dotted lines are used to add attributes to ideas.

Here are some examples:

# Write English sentences about the ideas in these information maps:

(c)

---

# BE and HAVE

My friend is kind.

“kind” is an adjective, 形容詞  
so use the BE-verb, “is”

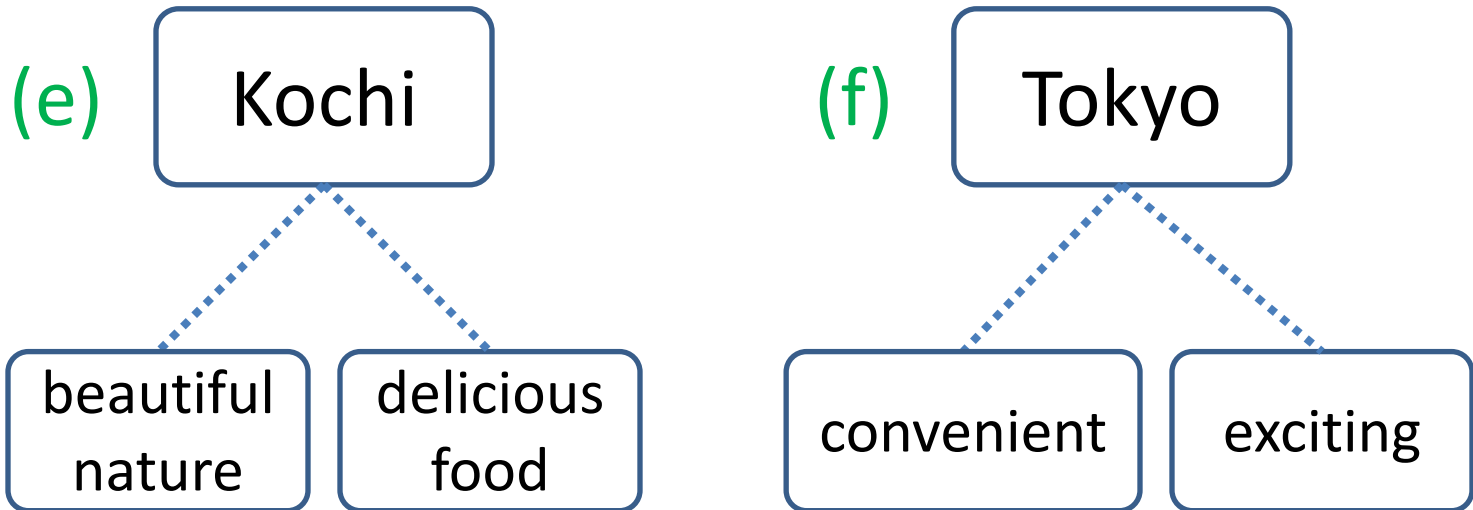

My father has short hair.

“short hair” is a noun, 名詞  
so use the HAVE-verb, “has”

# “and”

To combine two nouns, or two adjectives, in one sentence, we can use “and”.

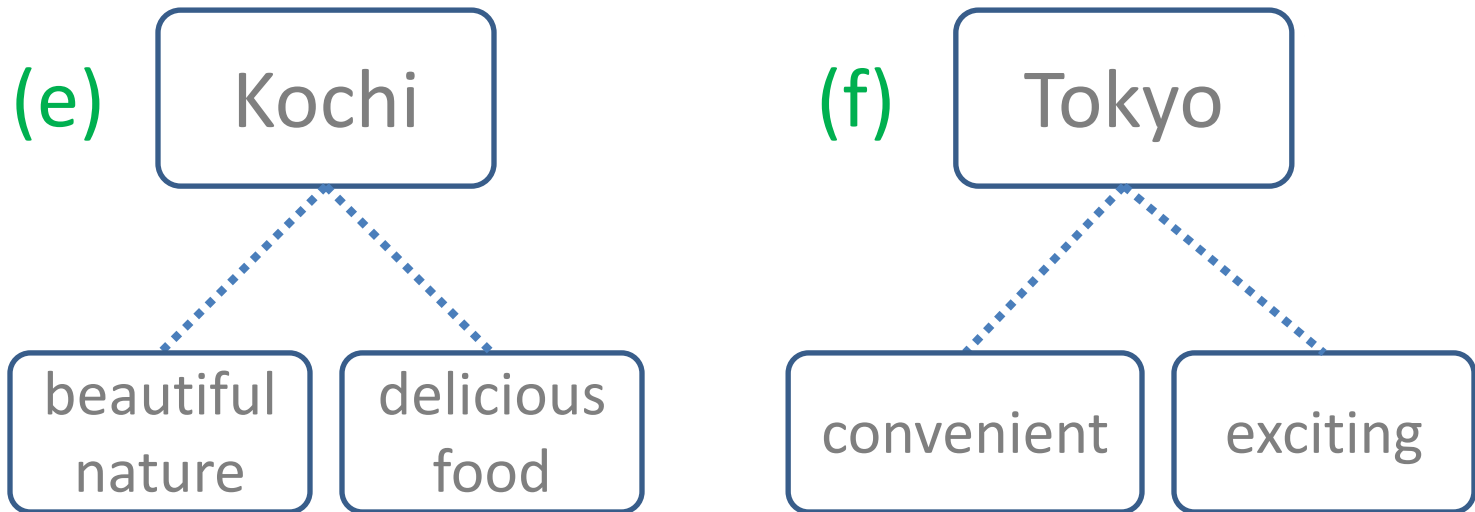

(e) \_\_\_\_\_

(f) \_\_\_\_\_

# Sentences and clauses 文と節

A clause is a group of words containing a verb.

A simple sentence has just one clause.

- I am from Osaka.

A sentence can contain two or more clauses.

- I am from Osaka but I live in Kochi.

# Relative clauses 関係詞節

Relative clauses are a way of giving more information about a person, thing, place, event, etc.

Source: <http://learnenglishteens.britishcouncil.org/grammar-vocabulary/grammar-videos/relative-clauses>

We often use relative clauses to avoid repeating information.

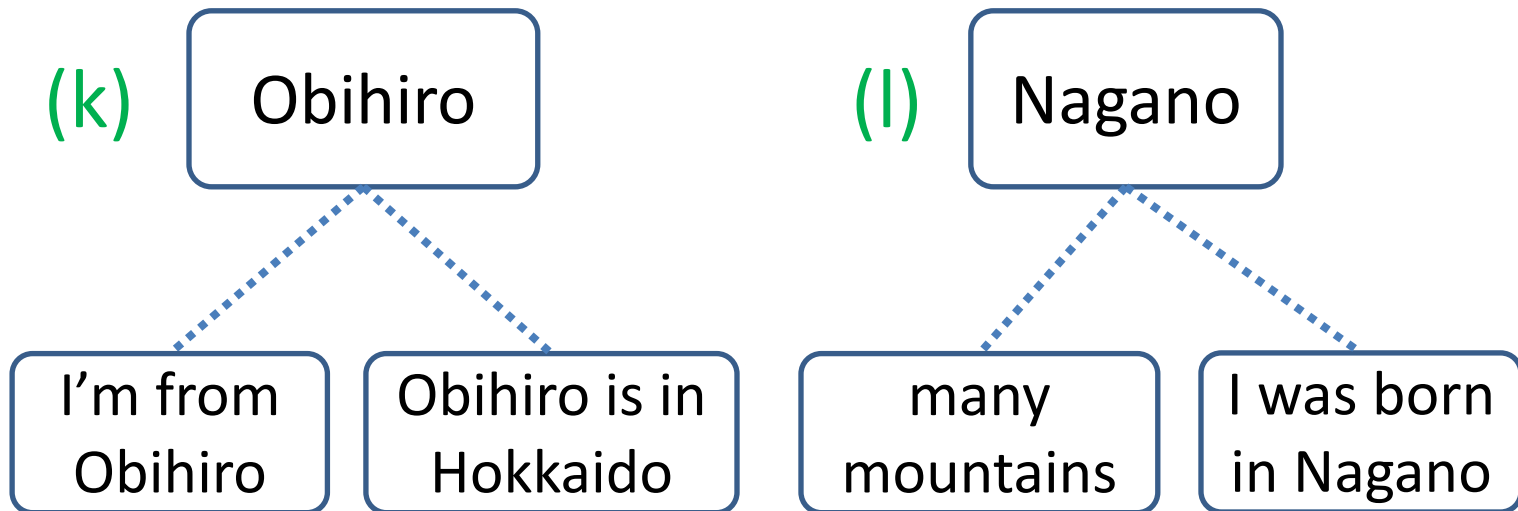

1. I grew up in Kami city.

2. Kami city is near Kochi.

=> I grew up in Kami city, which is near Kochi.
